

# JetAdvice Manager

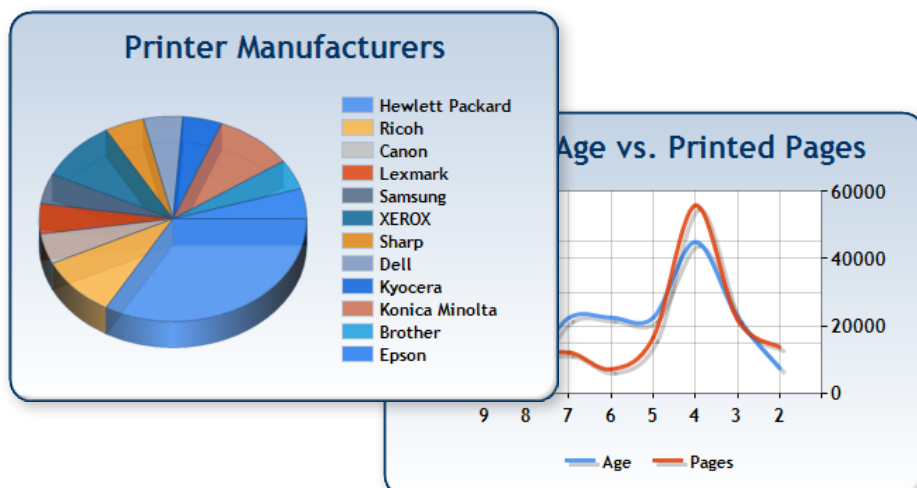

JetAdvice Manager helps you make smart decisions by delivering the right data, accurately and on time. Complete understanding of your print fleet is at your fingertips now! Simply the best on the market.

## Make the right decisions with accurate, JetAdvice data..

- Complete, vendor-independent, data collection on all networked and non-networked devices - multiple times daily. Color and mono, job type and more.
- Automated supplies ordering based on real and projected use; customized by device or customer.
- Flexible maintenance alerts and error messaging with multiple filter capabilities to adapt to your environment.
- Estimates power consumption and perform usage modeling to easily understand the true costs - at a glance.
- Audit, assess, and analyze all monitored devices - networked and non-networked - automatically.
- Fully customizable data export integrates with ERP, CRM and other business software systems - automated or on-demand, in multiple formats.
- Integrates with customized solutions via web service.

## Benefits

- Reduce manual entry errors for improved accuracy
- Save time and lower overhead costs
- Facilitate pay-per-use billing processes
- Balance device workloads
- Eliminate toner waste and unnecessary expenses
- Enable just-in-time supplies delivery
- Extend the life of devices
- Reduce maintenance calls
- Control replacement costs
- Place devices for workflow efficiency
- Curb CO<sub>2</sub> emissions
- Manage power costs
- Deliver accurate, comprehensive overviews - fast!
- Use in any print environment
- Vendor-independent data collection
- Cost-effective, full control of your information

## Learn more

### Meter Reading

Monitor all your devices and the use of different device capabilities; paper size, color, duplex and more.

### Supplies

Automate ordering of supplies to get the correct replacements and reduce inventories - just in time with less waste.

### Maintenance

Simplify maintenance to keep fleet functioning properly while minimizing user frustration, and preventing expensive down time.

### Environment and Economy

Correctly place all devices for efficiency or find costly older or mis-used devices to reduce power consumption, boost productivity, and manage supplies.

### Print Analysis

Know at a glance how all devices are used across your fleet, enabling factbased decisions that simplify purchasing, planning and budgeting.

### Reporting

Produce customized reports with timely, consistent overviews of color vs. mono use, supplies, firmware updates, and hundreds of other impactful data.

*Individual Feature-sheets are available on above topics.*

## Technical Specifications

### Installing DataCollector

- Less than 10 minutes installation and configuration
- No need to modify any element of the infrastructure
- Updates automatically
- Unlimited load
- Secure transfer of data to server

### Security

- No information is collected on the user or workstation
- Printing, MFD and other image devices analyzed
- Information is sent securely via FTP, HTTP or HTTPS
- Security document available

### Network requirements

- Use SNMP

### Device requirements

- Connected to network
- Active SNMP
- Powered on

### JetAdvice API

- REST web service
- Integrate directly into your software
- Extract data on demand
- Bulk management
- Process automation

### Installation requirements

- Connected to network
- Windows 2003/2008/XP/Vista/7
- Microsoft.NET 3.51 SP1 installed

### Collected data

- Manufacturer
- Model
- IP Address
- Serial number
- Part number
- Asset ID
- Meters
- Total cost including mono and color
- Color capability
- Duplex capability
- Laser functionality
- Device type (MFP, copier, etc.)
- Install date
- MAC address
- Device status
- Device alerts
- Toner levels (black, cyan, magenta and yellow)
- And much more

JetAdvice Manager  
Dashboard View

The screenshot shows the JetAdvice Home dashboard. It features a navigation sidebar on the left with options like Dashboard, Reports, Alerts, Assessment, Advice, Groups, Admin, and Help. The main content area is divided into several sections: Statistics (Overview table with columns for Week 1-4), Users (table with columns for User and Last Activity), News (a message saying 'Sorry, No data available'), Alerts (Account alerts and Device alerts sections with tables showing alert details like Customer, Date, and Device name/serial #), and Supply Alerts (a message saying 'No data available').

## About EuroForm..

EuroForm A/S is an independent software development company, based in Denmark. We are committed to adding true value to customers through providing second-to-none solutions that

optimize and enhance the use of laser printers and multifunction devices. EuroForm A/S is one of the first printer software developers to offer innovative solutions in the cloud.
