

# Print Analysis

Audit, assess, and analyze all monitored devices..

## Multiple filter capabilities adapt to your environment

- Collect networked and non-networked device data – automatically
- Completely vendor-independent, robust database
- Cost-effective, efficient, easy to use
- Eliminate manual inventories, reduce errors
- Find all your inventory, learn how devices are used
- Scheduled and/or on-demand analyses

## Benefits

- Accurate and comprehensive
- Overviews ready in minutes
- For any print environment
- Completely vendor-independent
- Cost-effective

- 🏠 DASHBOARD
- 📄 REPORTS
- 🔔 ALERTS
- 📊 ASSESSMENT
- 📌 ADVICE
  - Total
  - Missed Shutdown
  - Old Devices
  - High Color Usage
- 👤 GROUPS

VIEW FILTER EXPORT 21-12-2019 TO 21-01-2018

This is an average of all the available Advice Scores for the device. If you have a lot of devices in the Red Zone, we recommend that you focus your efforts here, in the Total Advice area, in order to address the most critical issues first.

### Advice Score Explanation

- **0-49 - Green Zone**  
We do not recommend any action based on Advice Scores in this zone.
- **50-74 - Yellow Zone**  
We recommend you be alert to devices in this zone. It is safe to simply observe and evaluate for a period of time if a device is placed in only 1-2 Yellow Zone Advice types - especially if you have devices with Red Zone Advice score which would require more immediate attention.
- **75-100 - Red Zone**  
We recommend you to take action on all devices placed in the Red Zone. Please notice that some devices might only be being used inefficiently or incorrect, while others should be replaced.

	Device name	IPv4	Serial #	Hostname	Total Score
1	HP LaserJet P2055dn	128.252.163.5	BRBSS91M05Q	NPI9C9075	92

1	Xerox Phaser 3635 MFP/S	128.252.125.236	BB1845163	hw260	46

## Learn more..

We often find that companies do not know how many printers they own, where they are located, who uses them, or even how much – or little – they are used.

Many companies have conducted surveys and statistics in spreadsheets, which usually are obsolete before they are completed. While consuming large amounts of time in the company collecting this information, it is often still inadequate and inaccurate. By installing JetAdvice Manager the entire process becomes automated.

It's quick to get started with the analysis of the company's print and copy usage. Installation is simple and takes less than fifteen minutes to be up and running and getting the first look.

JetAdvice is vendor independent, which gives you great development opportunities. We have collected over 100 basic pieces of information on each of thousands of different printers and copiers from multiple vendors. This vast library provides the broadest picture of device consumption in the industry.

### Basic information example:

- Installation date
- Device physical size
- Device weight
- Power consumption
- Print language (PCL, PostScript, PDF, more)

## About EuroForm..

EuroForm A/S is an independent software development company, based in Denmark. We are committed to adding true value to customers through providing second-to-none solutions that

optimize and enhance the use of laser printers and multifunction devices. EuroForm A/S is one of the first printer software developers to offer innovative solutions in the cloud.
